

SHARP

Naval aviation readiness and training management

Core Competencies

Agile Software Development
 Defense Readiness Reporting
 Net-Centric Enterprise Solutions

Development & Support
 Business Intelligence
 Onsite Customer Support & Training

The Sierra Hotel Aviation Reporting Program (SHARP) enterprise consists of two powerful, closely aligned web-based applications used by naval aviation squadrons to manage their overall training needs.

SHARP is accessed globally by Navy aviation units via the web, and is configured to work in a shipboard environment. It enables aviators to capture post flight information, including FRS/ACTC syllabi, fleet training and readiness data for calculating squadron readiness levels. SHARP's user-friendly interface helps with managing crew qualifications, designations, snivels, temporary active duty, and leave so aviation squadrons can more effectively plan and schedule training activities, such as flights, simulators and ground events.

SHARP also provides a robust reporting interface, allowing squadron personnel to create customized predefined and ad hoc reports.

SHARP LMS

The SHARP Learning Management System (LMS) is a comprehensive, web-based training system that provides single-source access to training information on virtually any media type preserving your current resource investment.

Using the existing SHARP syllabus framework, SHARP LMS introduces the Electronic Training Jacket (ETJ)—an electronic record of aircrew certification and training data used to track progress through customizable syllabi. Training can be self-paced, instructor lead, or any hybrid of the two. The comprehensive LMS provides seamless integration with all features of the Air Combat Training Continuum.

The SHARP Enterprise

An authoritative source for Navy Aviation training and readiness reporting.

- ✓ User-friendly flight scheduling
- ✓ Readiness assessment reporting
- ✓ Unclassified multi-user, web-based environment
- ✓ Improved support for detachment operations
- ✓ Access to interactive training courseware
- ✓ Dynamic scheduling for squadron/unit events
- ✓ Track aircrew certification and training
- ✓ Manage classified reference documents
- ✓ Complete classified grade sheets
- ✓ Track syllabus completion
- ✓ Cross Domain Solution (SIPR>NIPR>SIPR) Capable

SHARP is the Navy aviation community's authoritative resource for Defense Readiness Reporting System (DRRS-N) training pillar readiness and current readiness reporting.

The SHARP enterprise solution automates the Naval Air Forces Training and Readiness policy by capturing and processing training and resource expenditures, providing a powerful tool for tracking and managing aviation readiness data. It also provides single-source access to daily flight scheduling, tracks flight-essential qualifications and designations, and manages format training syllabi and grade sheets.

What We Do

InnovaSystems International is a leading provider of information technology and software solutions for the U.S. Department of Defense, the Office of the Secretary of Defense and other federal, state and local government agencies. Designed to support the National Security Strategy, we develop capability-based readiness assessment solutions by optimizing disparate data sources and operational systems to reduce costs, maximize efficiencies and streamline access to critical data.
